

Group Poster Project 15

MEETING MINUTES

Meeting/Project Name:	Group Poster Project 15		
Date of Meeting:	21/02/2023	Time:	3:15 PM
Minutes Prepared By:	Ana Marr	Location:	Allan Gilbert Building

1. Meeting Objective

- Narrative
- Structure of the Project
- Task Delegation

2. Attendance at Meeting

Name
Ana Marr
Michelle Cheung
DIFLA KARAKKADAN
Robin Kaur
Amina Khalif
Roshini Sam
Meenakshi Deswal

3. Agenda and Notes, Decisions, Issues

Topic

STEP 5:

Condition: Multiple Sclerosis

SILO: 1

Group Poster Project 15

STEP 7 - population + SILO

STEP 8 - brief narrative

- Persons age
- Previous Occupation
- How long did the person take to find out
- Differential diagnosis
- Role of RNs and nursing problems associated with it - social isolation; what is the patient's default; referrals;

Narrative:

28 years old Sage, female. She has been working in retail for 5 years. Six months ago, Sage started feeling tired and weak, she has been finding it difficult to lift lightweight things, even though she is reasonably fit and exercises regularly. She also has been experiencing blurred vision, long lasting back pain, and leg spasms.

Initially, Sage thought she was taking too many extra shifts at work or just normal exhaustion. She started taking painkillers, such as Neurofen and Panadol quite regularly. Sage also noticed her memory starting falling her a few times during the week, and she decides to visit a GP to investigate possible causes. The GP asks some blood tests and they return low ferritin levels. The GP prescribes iron supplementation and recommends that she rests.

Sage spends a month feeling quite normal and thinks that the iron supplementation might be working. However, after a month, Sage's symptoms started impairing her normal activities. Her sight becomes worse and she starts experiencing a lack of coordination to hold and move things, as well as tremors. Sage continues working but one day she faints during her shift and is sent to the nearest hospital.

Upon recovering her consciousness, Sage explains her recent symptoms to the doctor. The medical team goes on with her neurological assessment (MORE INFO HERE). After blood tests and a brain scan, Sage receives her diagnoses. Sage has Multiple Sclerosis.

STEP 9 -

Focus on philosophical, theoretical, practical and regulatory frameworks in MS instead of focusing too much on the disease.

Philosophical - Robin and Dial

Theoretical - Ana and Meenakshi

Practical - Michelle and Amina

Regulatory Framework - Roshini and Ana

*Digital poster How: interactive poster using keynote/powerpoint

*Finished Product: interactive poster with videos, audios and writing

*Review literature:

*Design:

*Writ the text:

*Proofreading:

*Double-check references:

4. Action Items

Action

Group Poster Project 15

Research Symptoms of MS;
Share information about MS;
Construct the Narrative.

5. Next Meeting

Date:	28/02/2023	Time:	3:15 PM	Location:	Allan Gilbert Building
Objective:	<ul style="list-style-type: none">•Gather information•Discuss•Structure the Poster - delegate tasks
