3. Agenda and Notes, Decisions, Issues

Topic

Neurodiversity: 4 group members are interested in doing the project on neurodiversity.

Amina organised a document with a summary of the project's rubric so we can all be aware of what the expectations are to achieve an excellent score.

Roshini researched and is at the moment setting up the group's GANTT chart.

A lot of misconception about what neurodiversity is; Michelle has an interest in neuroscience; options of interest: OCD, Multiple Sclerosis Disorder, Autism, ADHA.

The time the group members took to watch the videos and prepare for this meeting was considered as part of the total effort in the project.

Options discussed within the group (about step 7):

Multiple Sclerosis - will check with Jo about that possibility. SILOs: 1

Autism - SILOs: 5

Prader-Willi Syndrome: SILOs: 1
